

What's the best way to get UX?

Is ERP UX possible without customization?

Can UX be cost effective?

Can existing apps be UX ready?

Can UX be platform independent?

The **ANSWER** to all these is a resounding **YES!** All you need is

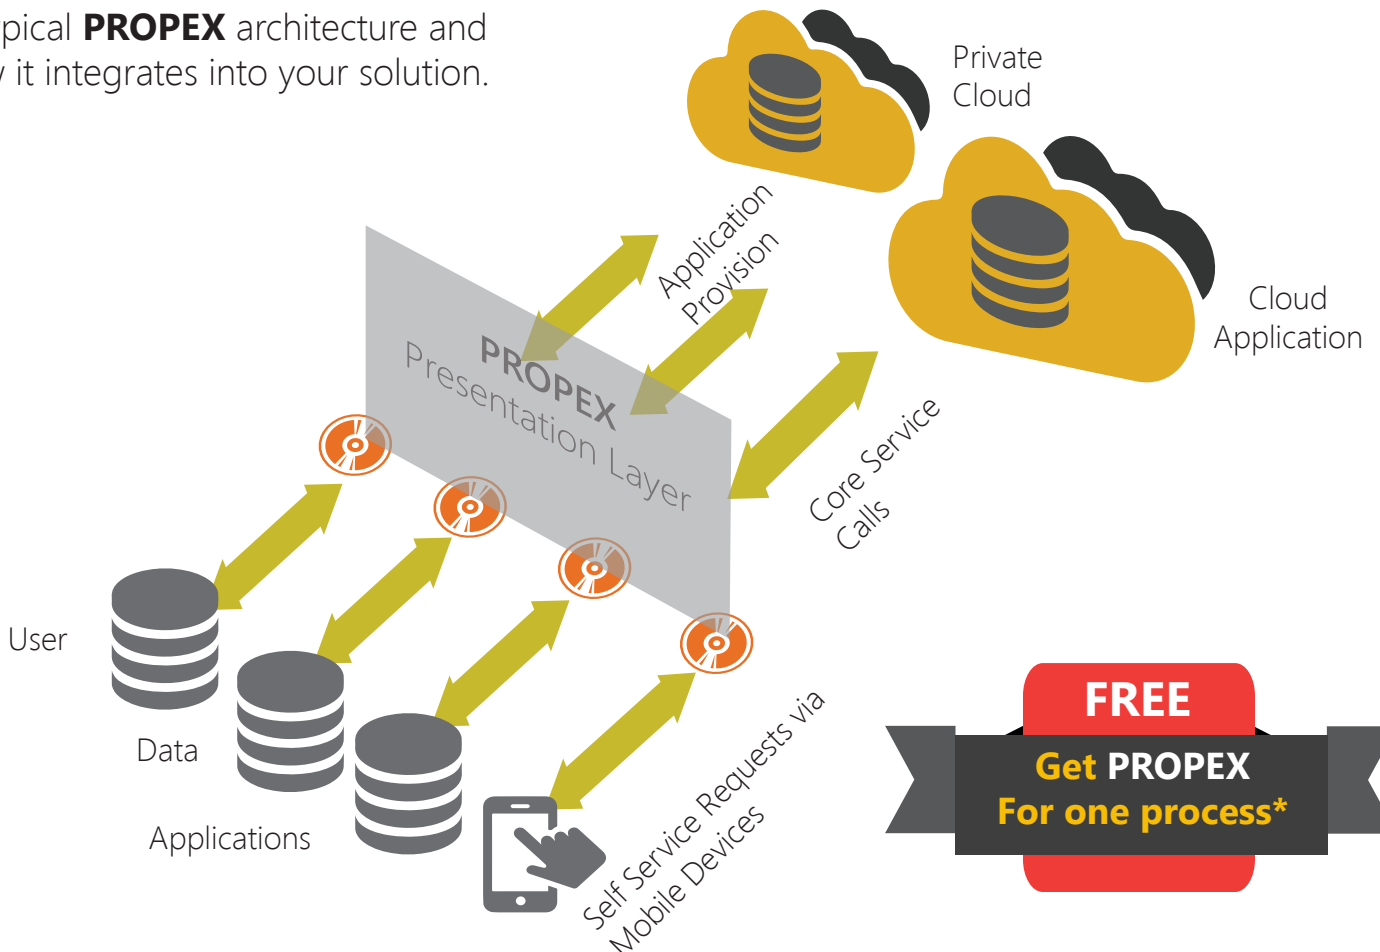

PROPEX

PROPEX is People Tech response and productized solution to the User Experience revolution that has taken today's business application world by storm. With PROPEX, you can take an application, whether an on-premise ERP instance, or on a Public or Private cloud, and implement business critical User Experience as a presentation layer mounted atop the application.

There are a multitude of advantages associated with using a presentations layer.

- ◆ Application base untouched
- ◆ Platform independence
- ◆ Extremely cost-effective
- ◆ Templates for ERP and packaged solutions
- ◆ Rapid deployment

A typical **PROPEX** architecture and how it integrates into your solution.

PROPEX

How **PROPEX** Works

Applications have a User Interface or UI, through which the machine communicates with the human. That's obvious!

What is equally obvious is that if we were to add a layer on top of the UI that picks up elements from the UI, processes it for User Experience and sends it to the user, it is simpler when compared to redesigning the UI of the application.

PROPEX uses the same principle and delivers packaged Application Experience solutions that cut across technologies, products, platforms and frameworks to give you Champagne User Experience on a beer budget. There, we said it!

PROPEX uses a variety of technologies but primarily Java/J2EE and Microsoft .Net and ASP to deliver flexible, yet reliable and secure presentation layers that stand the test of stress and time.

PROPEX - Where it is applicable

Everywhere! That's the beauty of PROPEX. Everything from your enterprise applications to even your HR processes can be PROPEXed (given valuable user experience using PROPEX). For example, your HR Information System applications such as

- ◆ Recruitment
 - Candidate Selection
 - Induction
 - Training
- ◆ Payroll
- ◆ Human Capital Management
 - Policy Implementation
 - Compliance Practices
 - Disputes and Arbitration
 - Grievances
- ◆ Terminations
 - Exit Procedures
 - Settlements

WHY PROPEX - Key Benefits

- ◆ Costs a fraction of typical UX Projects
- ◆ Delivery across platforms
- ◆ Compatible with Private and Public clouds
- ◆ UX without costly ERP Customizations
- ◆ Simple, yet effective

All of these can be PROPEXed with minimal effort and maximal result when you partner with People Tech. This is what we have on offer - we'll give you PROPEX for one process absolutely FREE!
